“The E-learning Observatory” for Spain and the Hispanic World

“ An E-learning Observatory, with lots of SCOPE ”

SCOPEO, the “E-learning Observatory” for Spain and the Hispanic World, develops rigorous and unbiased monitoring and research on e-learning in four main sectors (pre-university levels of education, higher education, public administration and private companies), promoting effective initiatives involving information and communication in this field.

MISSION

The E-learning Observatory SCOPEO, has emerged with the mission to become an independent, trustful and rigorous leading centre of opinion and research on e-learning in Spain, with particular attention to the dynamics in the Hispanic World, mainly Latin America and the Caribbean. SCOPEO is specialized in the study and analysis of the transmission of online education knowledge to society.

VISION

The E-learning Observatory SCOPEO, aims to conduct rigorous and continuous research work and serve as reference opinion centre on the implementation of e-learning in Spain and the Hispanic World in four main strategic sectors of activity:

- ✓ Infant, primary, secondary education and vocational training (Pre-university Education)
- ✓ Colleges and Universities (Higher Education)
- ✓ Public Administration
- ✓ Private Companies

OBJECTIVES

The overall objective of the E-learning Observatory SCOPEO is to transmit and promote e-learning in society through actions such as:

*Constantly evaluate the educational use of ICT in four basic fields of research (pre-university levels of education, higher education, public administration and private companies) as well as cross-cutting themes related to these four areas.

*Provide current, valid and relevant information to all institutions and individuals, who want to include or develop formative actions using new technologies, and keep them permanently informed about the dynamics of the sector.

*Generate, around SCOPEO, a global community of users, researchers, specialists, training managers and students to share and spread information and develop joint activities around the encouragement and improvement of educational experiences with ICT.

ABOUT US

Scopeo is a joint effort that comes from the integration of two main backgrounds around e-learning. On the one hand, the experience, interdisciplinary work and research developed by the **University of Salamanca** on education, society and technology, and, on the other hand, canalize the commitment and social experience that has been undertaken by the **Germán Sánchez Ruipérez Foundation**, through the **International Center for Advanced Technology (CITA)**, to promote social inclusion and improve people's digital competence. Both institutions count with the special collaboration of the **Regional Government of Castilla y León** with whom SCOPEO's action policy is designed.

Board of members

Honour Committee

Presidence

D. Daniel Hernández Ruipérez

Rector Magnífico de la Universidad de Salamanca

D. Germán Sánchez Ruipérez

Presidente de la Fundación Germán Sánchez Ruipérez

Members

D. Antonio Silván Rodríguez

Consejero de Fomento de la Junta de Castilla y León

Dña. Isabel Alonso Sánchez

Consejera de Administración Autonómica de la Junta de Castilla y León

Steering Committee

Presidence

Dña. Pastora Vega Cruz
